

# Lab-3 Ex5 - Minimum and Maximum

In this exercise, write a program to find out the *maximum and minimum values* among the 4 *user-input integers* (a, b, c, d).

User-input integers are ***bold and italic*** in the following sample runs.

---

**Sample run #1:**

***12 7 3 16***

The minimum value is 3 whereas the maximum value is 16.

---

**Sample run #2:**

***8 8 -1 3***

The minimum value is -1 whereas the maximum value is 8.
