

Lab-7 Ex8 - Letter Bridge

Let's write a program to draw a letter bridge.

Ask the user for height of the bridge, and the program shall draw the bridge accordingly. You are not required to verify the input range, but you can assume the height will be *at least 1* and *at most 26*.

There are some hints in the provided *main.c*.

User-input numbers are *bold and italic* in the following sample runs.

Sample run #1:

Input bridge height: *1*

AA

Sample run #2:

Input bridge height: *5*

EDCBAABCDE

EDCB..BCDE

EDC....CDE

ED.....DE

E.....E

Sample run #3:

Input bridge height: *10*

JIHGFEDCBAABCDEFGHJIJ

JIHGFEDCB..BCDEFGHJIJ

JIHGFEDC....CDEFGHJIJ

JIHGFED.....DEFGHJIJ

JIHGFE.....EFGHJIJ

JIHGF.....FGHJIJ

JIHG.....GHIJ

JIH.....HIJ

JI.....IJ
