

# Lab-10 Ex1 - Letter and Digit Conversion (Prelab\*)

*This is a PreLab exercise. Please do the PreLabs after each lecture and submit before you come to lab!*

Write a C program to read a non-empty string, convert all lower case letters to upper case letters and convert all upper case letters to lower case letters. For digits, convert a digit  $d$  into  $10-d$ , i.e. 1 becomes 9. Assume users will only use digits 1 to 9.

You can assume that the user will only enter at most 20 characters without any spaces.

User input is ***bold and italic*** in the following sample runs.
